DEFINITIONS

Total Loss For the purpose of Lloyd's Register Casualty Return the term 'Total Loss' refers to a merchant ship which, as a result of being a marine casualty, has ceased to exist, either by virtue of the fact that the ship is irrecoverable or has subsequently been broken up. Ships which have been declared constructive total losses but which are undergoing or have undergone repairs are not included. Ships of less than 100 gross tonnage are not included in the Return.

Casualty Categories are defined as follows:

Foundered Includes ships which sank as a result of heavy weather, springing of leaks, breaking in two, etc., but not as a consequence of categories listed below.

Missing After a reasonable period of time, no news having been received of a ship and its fate being therefore undetermined, the ship is posted as 'Missing' at the Corporation of Lloyd's and is included in the Missing category on the data base together with similar cases reported by other reliable sources.

Note: In peacetime, missing ships are considered as losses occasioned to ships by marine perils.

Fire/Explosion Includes ships lost as a result of fire and/or explosion where it is the first event reported.

Note: It therefore follows that casualties involving fires and/or explosions after collisions, stranding, etc., would be categorised under 'Collision', 'Stranding'.

Collision Includes ships lost as a result of striking or being struck by another ship, regardless of whether under way, anchored or moored. This category does not include striking underwater wrecks.

Contact Includes ships lost as a result of striking an external substance but *not* another ship or the sea bottom (see categories 'Collision' and 'Wrecked/Stranded'). This category includes striking drilling rigs/platforms, regardless of whether in fixed position or in tow.

Wrecked/Stranded Includes ships lost as a result of touching the sea bottom, sandbanks or seashore, etc., as well as entanglement on underwater wrecks.

Lost, etc.

- (i) **War Loss/Damage during Hostilities.** This category is intended to encompass loss occasioned to ships by hostile acts.
- (ii) **Hull/Machinery Damage** Includes ships lost as a result of hull/machinery damage or failure which is not attributable to any other category.
- (iii) **Miscellaneous** Includes ships which have been lost which, for want of sufficient reasons, cannot be classified.

3 **Date of Casualty** The date of casualty is that on which the first reported event of the casualty occurred.

Summary of Total losses during 1984

The total tonnage lost during 1984 (2,353,941 gross tonnage) showed an increase of 881,330 gross tonnage over the figure for 1983. While the number of total losses (327) is the lowest since 1974, the tonnage is the highest figure ever recorded, over forty-eight per cent being attributable to the Iran-Iraq conflict. Comparisons over a period of ten years are shown at the end of Table 1.

The largest ship totally lost during the year was the Cypriot steam tanker MINOTAUR (189,405 gross tonnage, built 1976).

Foundered The number of ships that foundered during 1984 (131) was four more than the previous year. Over thirty-seven per cent of these were twenty years old or more. The tonnage lost in this category showed an increase of 52,745 to a figure of 212,936 gross tonnage.

Two notable losses occurred in heavy weather in the English Channel. In January the Liberian general cargo ship RADIANT MED (2,997 gross tonnage, built 1970) capsized and sank southwest of Guernsey with the loss of sixteen lives. Fifteen days later eight lives were lost when the Panamanian general cargo ship MIDNIGHT SUN I (2,531 gross tonnage, built 1982) also capsized and sank near Ushant. Both foundered after taking water through cargo areas.

The largest ship lost was the bulk carrier HENNIGSDORF (GDR flag, 21,739 gross tonnage, built 1966) which sank off Portugal whilst on voyage from Rio de Janeiro to Rostock.

Missing Four ships were reported as missing during the year. Tonnage in this category totalled 15,767 gross tonnage, mostly accounted for by the Italian bulk carrier TITO CAMPANELLA (13,342 gross tonnage, built 1962). This ship was on voyage from Oxelosund to Piraeus with a cargo of iron plate and was last reported in the Bay of Biscay on the 14th January. Twenty-four crew members were reported missing.

Fire/Explosion Gross tonnage totally lost in this category during 1984 was 364,729 a decrease of 310,347 gross tonnage over 1983, even though the number of losses fell by only one. This is the lowest tonnage recorded since 1976.

Ten tankers were lost in this category, the largest being the Liberian motor tanker CASPER TRADER (67,420 gross tonnage, built 1971) which was damaged by an explosion and fire and was subsequently broken up. Other notable losses included the PUERTO RICAN (20,295 gross tonnage, built 1971) which was damaged by explosion and fire and subsequently broke in two spilling 100,000 gallons of oil into the sea and the AMERICAN EAGLE (20,520 gross tonnage, built 1959) which capsized and sank in heavy weather following an explosion on the previous day. The vessel, on voyage from Savannah to Galveston was in ballast at the time of casualty. Both were steam tankers registered in the United States of America. Two small Japanese coastal tankers were lost whilst gas-freeing at sea.

The oldest ship totally lost during 1984, was also in this category. The eighty-two year old general cargo ship CAPTAIN MORGAN (TKC flag, 101 gross tonnage, built 1902) sank after a fire in the engine room.

Collision Gross tonnage lost through collision increased to 65,990. Whilst the number of ships in this category remained the same, tonnage lost showed an increase of 14,497 over the 1983 figure. At least thirteen of the collisions occurred in bad visibility or fog.

One notable loss in this category was the French roro cargo ship MONT LOUIS (4,210 gross tonnage, built 1972) on voyage from Dunkirk to Riga with a cargo of uranium hexafluoride, steel and general cargo. The other ship involved was the passenger/cargo ferry OLAU BRITANNIA (GFR flag, 14,981 gross tonnage, built 1982) which sustained minor bow damage.

The largest ship lost through collision was the Colombian general cargo ship RIO CAUCA (11,656 gross tonnage, built 1964).

Contact Seven ships were lost in this category during the year amounting to 29,573 gross tonnage. The largest was the Panamanian passenger cargo ship COLUMBUS C (16,317 gross tonnage, built 1953) which struck a breakwater whilst entering Cadiz with 620 passengers.

Wrecked/Stranded Total losses in this category showed a decrease both in the number of incidents and in the tonnage lost. There were sixty-nine ships of 360,648 gross tonnage in 1984 compared with ninety-three ships of 453,872 gross tonnage in 1983.

The largest ship was the Mexican steam tanker AGUILA AZTECA (113,531 gross tonnage, built 1969) which stranded on a reef whilst on voyage from Mexico to Europoort laden with 196,000 tonnes of crude oil. This ship was subsequently refloated without further incident and taken to Ulsan for breaking up. However, pollution did occur when the steam tanker MOBILIOIL (USA flag, 18,615 gross tonnage, built 1959) spilled 700 tonnes of heavy oil into the Columbia River after stranding due to steering failure.

One interesting loss in this category was the steam container ship JERVIS BAY (GBI flag, 26,867 gross tonnage, built 1970) which stranded after completing the first stage of a delivery voyage to Taiwan for breaking.

Lost, etc. As already indicated, the largest percentage of tonnage lost during the year fell into this category. Hostilities accounted for twenty ships in four geographical areas, fourteen of which were lost through the Iran-Iraq conflict. At the time of press decisions were awaited on a number of ships still intact in the region which will effect the overall picture. (See also Part 3 Serious Casualties). The other six ships all sustained damage by mines, four off the Nicaraguan coast, one in the Red Sea and one at Luanda. The largest ship lost was the Cypriot tanker MINOTAUR (189,405 gross tonnage, built 1976) damaged 10 miles S.W. of Bushire and subsequently sold for breaking. The Greek tanker NINEMIA (111,688 gross tonnage, built 1976) was hit by a missile on the 15th December and again the following day whilst under tow as a result of the first incident.

Eight ships over 100,000 gross tonnage are included in this category, seven of which were in the Gulf region. The eighth was the Greek tanker ATIA C (105,013 gross tonnage, built 1972) coincidentally on voyage to the Gulf when she sustained machinery damage off Djibouti and was subsequently sold for demolition.

The total number of 327 ships lost during 1984 included 17 tankers, gross tonnage 1,541,850 (65.5 per cent), 17 carriers, gross tonnage 270,805 (11.5 per cent) and 73 craft. One hundred and seventy-eight general cargo ships were lost.

Forty-six per cent of ships lost were under 500 gross tonnage. The number of ships lost with a gross tonnage 10,000 or more was forty-two, of which nine were over 100,000 gross tonnage.

Nearly seven per cent of all ships lost were less than five years old; seventeen per cent were twenty-five or more years of age.

Lost. The number of persons reported killed or missing as a result of total losses are indicated below for the years 1980-1984. The figure for 1984 (525) shows a decrease of one hundred and seventy-two from last year's figure.

Greatest loss occurred when the Philippine ferry/general cargo VENUS (746 gross tonnage, built 1944) foundered off Budou Island during tropical storm Warren with the loss of 266 lives. Twenty-six lives were lost on the Spanish side

trawler ISLAMAR TERCERO (216 gross tonnage, built 1971) which foundered 70 miles south of Las Palmas after a cargo of fish shifted in heavy weather and the Panamanian tanker TESUBU II (13,154 gross tonnage, built 1970) which disappeared presumed foundered off the Gulf of Aden after taking water during heavy seas also claimed twenty-six lives.

Seven ships sustained twenty or more human casualties during 1984. Over sixty per cent of all lives lost were reported against ships in the foundered category, as opposed to just over five per cent who died as a result of hostilities. Sixty-eight people were reported lost on the four ships in the missing category. Fatalities were recorded against all ten tankers in the Fire/Explosion category which accounted for another thirty-five lives.

Registration Panama, Japan and Greece suffered the highest number of ships lost, with 49, 47 and 21 respectively. Greece suffered the highest tonnage loss with 480,115 followed by Liberia with 424,300.

Total losses to the following countries whose merchant fleets totalled more than six million gross tonnage are shown below with comparative figures for 1983 shown in parentheses. Further comparisons can be obtained from Table 5.

Summary of ships Broken up, etc., reported during 1984

Number of ships reported broken up during 1984 increased by 992,115 to 17,750,962. This is the highest total ever recorded, following the upward trend established in 1982. Number of ships involved (1,785) is 475 more than in 1983 and again the highest number ever recorded. Comparisons over a period of ten years are shown at the end of Table 1.

Largest and youngest ship broken up during the year was the Korean steam tanker ULSAN MASTER (274, 838 gross tonnage, built 1977). The 555,051 deadweight ULCC, completed two years ago as the Pierre Guillaumat, was at that time the largest ship ever built.

Oldest ship broken up in 1984 was the Canadian Great Lakes freighter CONALLISON (8,926 gross tonnage, built 1906) which was broken up in Spain.

Oil/oil carrier CLEARWATER BAY (HKG flag, 120,698 gross tonnage, built 1973) prior to being broken up, was used in a land reclamation project on the west coast of the Korean peninsula. The ship was sunk by pumping seawater into the cargo holds and

formed a breakwater, allowing completion of the sea defences. Subsequently the ship was pumped out and taken to Inchon for demolition.

Countries sending most tonnage to the breakers during the year were as follows:

	Gross tonnage
Greece	3,284,962
Panama	2,399,430
Liberia	2,313,402
Japan	1,288,390
United States of America	663,057
Saudi Arabia	619,577
Malta	588,401
Norway	583,640
Netherlands	532,357
United Kingdom	509,007

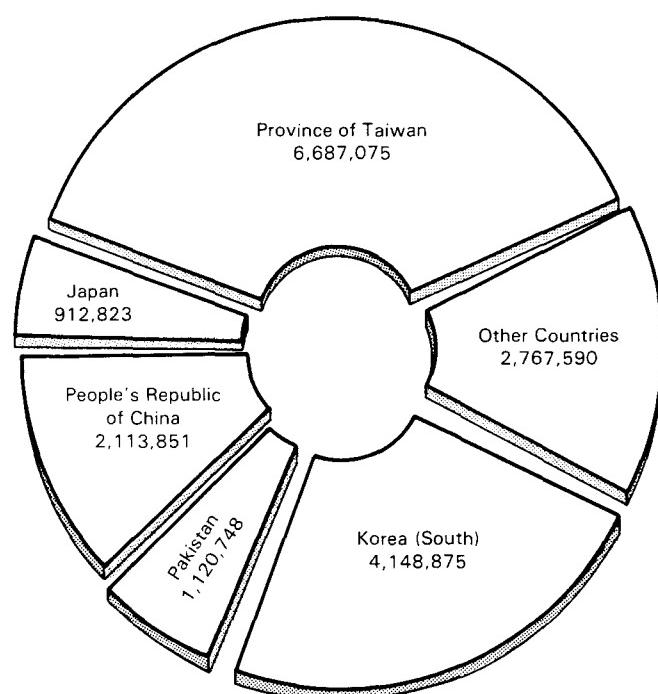

The People's Republic of China emerged during the year as a major shipbreaking centre taking almost twelve per cent of all tonnage broken up. One hundred and sixty-three ships were demolished.

there in 1984 as against ten recorded for the previous year. The tonnage percentage for the Province of Taiwan fell from 46.6 per cent to 37.7 per cent (a decrease of 1,127,436 gross tonnage) even though seventy-five more ships were demolished. Korea (South) showed a small increase with 23.4 per cent, taking twenty-one more ships than in 1983. The figure for Pakistan fell to 6.3 per cent from 10.1 per cent recorded for the previous year. Again more ships were demolished but less tonnage. No significant percentage increases were shown by European shipbreakers. Japan demolished the highest number of ships with 463, mostly domestic tonnage.

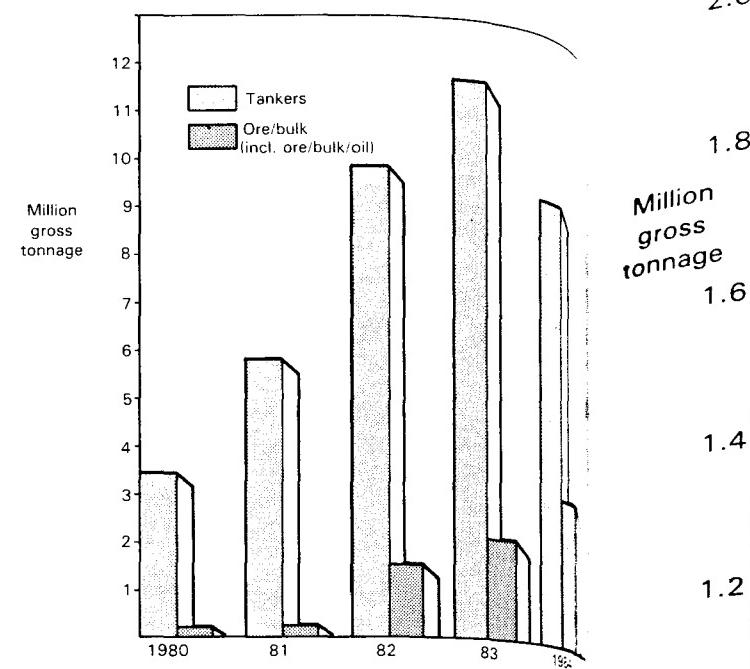

Tanker tonnage disposed of (9,474,796 gross tonnage) to 53.4 per cent of the total sold for demolition. This is a decrease of nearly seventeen per cent from the figure recorded for 1983. The average size of tanker broken up was 35,092 gross tonnes. Forty-one tankers of 100,000 gross tonnage and above were broken up during the year, all were steamships. A comparison between tankers and bulk carriers broken up over a period of years can be seen below.

Principal places of Disposal

(showing gross tonnage broken-up)

Tankers and Bulk Carriers broken up, etc., 1980-84

Nine hundred and forty-seven general cargo ships were broken up, an increase of 378 compared with 1983. Almost seventy per cent of these were twenty years old or more. Included in this figure are sixty-three refrigerated cargo carriers totalling 310,000 gross tonnage.

Serious casualties

Owing to the prevailing market conditions and also the Iran-Iraq conflict, there is a growing number of ships seriously damaged, or, as in the case of the war, trapped and/or damaged, for which a decision regarding repair or disposal has been considerably delayed. A separate section dealing with these cases is included in this Return (see Part 3). They will, of course, appear in the relevant Casualty Return at the time of their eventual disposal.

Ships reported sold for Breaking up

There are an increasing number of ships which have been reported sold for breaking up, but where demolition did not commence during the period covered by this return. As an extra service we are providing an alphabetical list of these ships, together with their gross tonnage, in a separate section at the end of this return (see Part 4). They will, of course, appear in the relevant Casualty Return at the time of their eventual disposal.
